

WORKPLACE STANDARDS

Work From Home Policy

Overview

SWS AI supports a hybrid work model. Employees may work from home subject to manager approval, role requirements, and project timelines. This policy sets expectations for productivity, communication, and security while working remotely.

Eligibility

WFH is available to all full-time employees who have completed their probation period (3 months). Employees on a PIP or those with attendance concerns may not be eligible for WFH.

WFH Days

Employees may work from home up to 3 days per week in a hybrid arrangement. Full-time WFH arrangements require specific approval from the HR Head and are limited to exceptional circumstances.

Productivity Expectations

WFH employees must:

- Be available on all communication channels (Slack, email) during working hours.
- Attend all scheduled meetings with camera on.
- Meet daily standup commitments.
- Deliver work on time as if working from the office.

Home Office Requirements

Employees working from home must have:

- A stable internet connection (minimum 50 Mbps).
- A dedicated quiet workspace.
- Company-issued or approved device with security software installed.
- A webcam and headset for video calls.

Security Requirements

When working from home, employees must:

- Use the company VPN at all times.
- Not access company systems from public Wi-Fi without a VPN.
- Lock their computer when stepping away.
- Not share their screen or device with household members.

Expense Policy

SWS AI does not reimburse internet, electricity, or home office setup costs unless specifically pre-approved by management. Company-issued equipment is provided to all full-time employees.
